

Diagram illustrating a road cross-section. The total width is labeled "APPROX. 50'". The road is divided into a "R/L" (Right Lane) and a "LEFT LANE". The "RIGHT-OF-WAY" is indicated on both sides. The road surface is shown with a slight dip in the center, and the shoulders are marked with dashed lines.

The diagram illustrates the cross-section of a two-lane highway. Key dimensions and components include:

- RIGHT-OF-WAY:** The outermost boundary on both sides.
- Clear Zone:** Indicated on both sides, with a note "VARIES BASED ON SLOPE".
- Shoulders:** Each side has a 10' shoulder.
- Travel Lanes:** Each side has two travel lanes, each 12' wide.
- Median:** A 50' median separates the two travel lanes.
- Clearance:** A 6' clearance is shown for the shoulders.
- Approximate Dimensions:** The total width of the travel lanes and shoulders on each side is approximately 90'.
